# Principal Message

Dear Parents and students

Greetings from JPIS fraternity!

Firstly my best wishes for all my students for the stress free final term exam, may they all get passed with flying colours and promote to next class.

This is the end of another successful school session and I am taking privilege to extending my gratitude for your kind cooperation through out the session.

We have worked hard to make the teaching learning more fruitful, joyful and engaging to enhance the growth of our students in every sphere whether it's sports, art, curricular activities and so on and your unwavering support was an igniting force through out this journey.

Hoping to have your cooperation and encouragement in the coming sessions too. Once again best wishes for students.

Warm regards  
Principal  
JPIS

# Pre-Primary Activity Zone

# GLOBAL WARMING

Global warming is the continuous rise in warming of the earth's surface due to the increase level of carbon dioxide gas in the environment. Global warming has become a big issue which needs to be solved by the positive invitation of countries all over the world. As gradual increase in the earth temperature calls various threats as well as makes the existence of life hard on this planet. It enhances the gradual and permanent changes in the earth climate and thus affecting the nature balance. Rise in the CO<sub>2</sub> level on the earth impacts the human life to a great level through continued heat waves, sudden occurrence of strong storms, unpredictable and unexpected cyclones, damage to ozone layer, floods, heavy rain, drought, lack of food, diseases, death etc. It has been researched that increasing emissions of CO<sub>2</sub> in the atmosphere is because of the nonstop burning of fossil fuel, usage of fertilizers, cutting forest, extra use of electricity, gases used in refrigerator etc.

# Reading Writing and Learning

Reading, Writing and Learning comes under knowledge and knowledge is very important. If you want to speak anywhere so it is important that you have knowledge because knowledge gives you words to speak, but skills are very different from knowledge. You will read books, write one page writing daily and learn something in everyday. If you will do this so I really say this with trust that you were skilled in many fields. With good writing you will become a calligraphist (one who is an artist in writing), with good reading you will become a successful politician, professor and it will be possible only when you will try. A knowledgeable person only knows about any field what is that but a skilled person knows how to perform work or action on that. Degree matters but not always than a skilled person's skills. One more thing that—you have a good knowledge but if you do not respect your elders and teachers so you are not fit for any work. So, respect your elders and teachers.

I mentioned this article with influence of an inspiring speech.

# Our Board Warrior

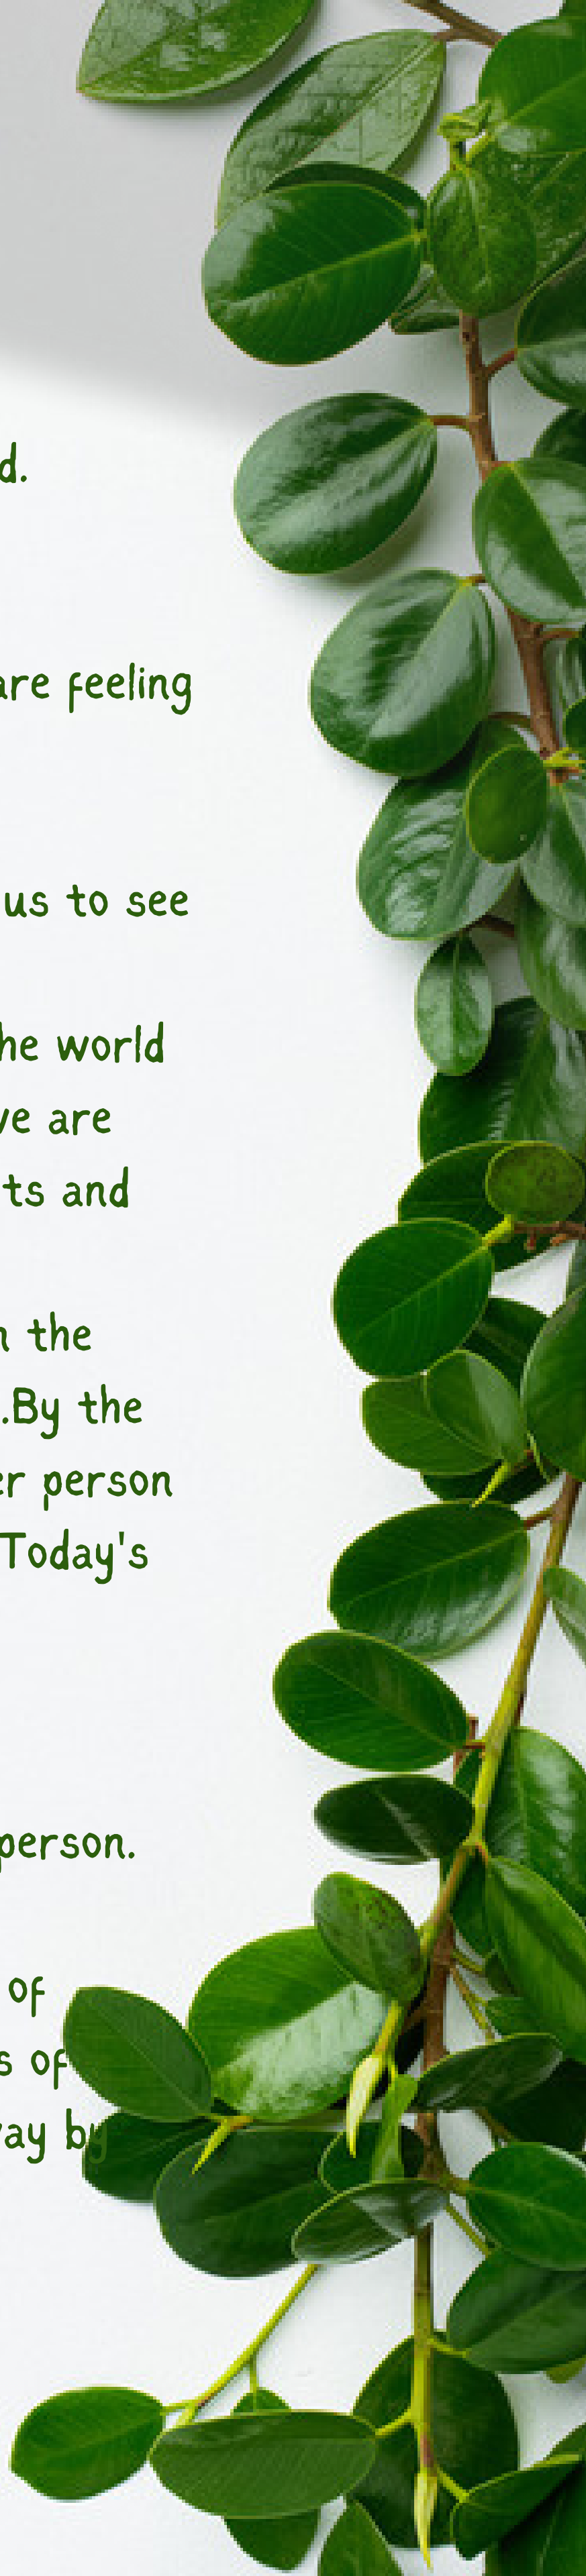

# SCIENCE

It is the rule of science in all over the world. Everyone talk about the science at everywhere. Because of the magic of science today we are feeling cold in hot days and hot in cold days. Invention of science as- rockets,airplane and submarine are helping us to see the outer world.By the help of submarine we are able to see the world downward the sea.By the help of rockets we are able to see the space, universe, other planets and different types of asteroid.By the help of science we can find the precious material in the earth .Mobile is also the example of science.By the help of mobile we can talk and see the other person or our relatives who are living far from us.Today's science is like a magical box.Because it is able to complete all the wishes of a preson and can give the good life to a person. Scientist are trying to build the houses on MANGAL GRAH.That is also done because of science.There are so many benefits and loss of science.If science will be used in a better way by scientist it will be good for all persons.

# Chandrashekhar martyr day

Chandrashekhar Azad, born on July 23, 1906, was a prominent Indian freedom fighter who played a crucial role in the struggle against British colonial rule. His original name was Chandrashekhar Tiwari. Azad, meaning "The Free," was the name he adopted as a symbol of his commitment to a liberated India.

Azad's early life was marked by a deep sense of patriotism and a desire for independence. He became actively involved in the non-cooperation movement led by Mahatma Gandhi in 1920. However, after the tragic Jallianwala Bagh massacre in 1919, he grew disillusioned with non-violent methods and embraced armed resistance.

One of the founding members of the Hindustan Socialist Republican Association (HSRA), Azad worked alongside other notable freedom fighters such as Bhagat Singh and Rajguru. He believed in the power of armed struggle to achieve India's independence and rejected compromises with the British rulers.

Chandrashekhar Azad gained notoriety for his audacious actions against the British authorities. He was involved in the Kakori Train Robbery of 1925, an attempt to loot the government treasury carried out by HSRA to fund the revolutionary activities. During the ensuing police encounter, Azad managed to escape, showcasing his strategic acumen and bravery.

The legendary incident at Alfred Park, Allahabad, in 1931 exemplifies Azad's unwavering commitment to the cause. Surrounded by the British police, he chose to sacrifice his life rather than surrender. He fought valiantly, holding off the police until he had only one bullet left, which he used to take his own life to avoid capture.

Chandrashekhar Azad's legacy remains etched in India's struggle for independence. He is remembered as a fearless revolutionary who dedicated his life to the pursuit of freedom. His contributions continue to inspire generations, and his name resonates as a symbol of courage and determination in the fight against oppression.

## Teacher Of The Month

IS

### Mrs. Pinki Jha

for outstanding performance and dedication as a teacher during the month of February 2024.

---

MRS. PARUL SINGH

Principal

A vertical rectangular card with a white background and a thin gold border. The card is set against a dark, marbled background. The text "Thank You" is written in a large, white, cursive font with a soft blue glow. The card is decorated with gold confetti in the top-left and bottom-right corners and gold leaf and branch illustrations in the top-right, bottom-left, and right-center areas.

Thank  
You
